### Validation Tools & Validation Tool Recalibration Discontinuation Announcement

For many years Distek has sold dissolution bath USP and ASTM validation tools and offered a calibration/recalibration service. However, such tools and recalibration services have now become readily available from multiple suppliers worldwide. After carefully reviewing the evolving validation tools and recalibration business, coupled with the broad availability of alternative sources, Distek has decided to exit this business segment.

Therefore, starting on 1st of January 2023, Distek will no longer offer both Distek manufactured and 3rd party tools for sale. Until then, we will continue to offer these on an “as available” basis. Please check with your Distek Representative or Sales Support to confirm availability. To help you source these tools going forward, you will find at the end of this notice a list of the 3rd party tools we had been supplying, along with the vendor and vendor part number. We will also cease offering recalibration services for all validation tools. To give you time to identify an alternative recalibration supplier, we will continue to offer this service until the 1st of April 2023. **All tools to be recalibrated must be received at Distek by the 31st of March.**

If you have any questions regarding this change or need assistance in finding alternative suppliers of these tools or recalibration services, please feel free to contact us.

| <u>VALIDATION TOOL*</u> | <u>SUPPLIER</u> | <u>WEBSITE</u>     | <u>SUPPLIER PART NUMBER</u> |
|-------------------------|-----------------|--------------------|-----------------------------|
| Digital Level           | Penn Tool Co.   | www.penntoolco.com | 901-010-1                   |
| Tachometer              | Checkline       | www.checkline.com  | CDT-1000HD                  |
| TempChek                | TE Connectivity | www.te.com         | 90-5451                     |
| Wobblemeter             | MSC             | www.mscdirect.com  | 5893177                     |

\*We will continue to provide repair services and spare parts for Distek manufactured tools (HeightChek, CenterChek, ShaftChek), however the user will then have to arrange for their recalibration following the repair.
